

# CAPE CARANCAHUA WSC SPLASH NEWSLETTER

Volume 1/Issue 7

## MEMBERS INPUT WANTED

CCWSC has already received a verbal donation of 2 loads of dirt and 2 loads of sand from Aaron Starnes of A&A Trucking for the area next to the water department building to provide donated recreational activities for the community; such as a golf driving range, disc golf, and volley ball. A volley ball net has been donated by an anonymous member. We are looking for input from the community. If you would like to donate equipment toward this venture, please contact us at: [ccwsc2009@yahoo.com](mailto:ccwsc2009@yahoo.com).

Our Commitment,  
Our Profession*

## CCWSC WATER DEPARTMENT HIGHLIGHTS

### What's happening this month

- We have added a bulletin board outside of the main water department building to post public notices for members.
- We are addressing the defamation that the CCPOA spoke and wrote on their BOD Meeting Minutes on July 13, 2022 with our Attorney. Everything that was stated in this is completely fabricated and can be proven by documentation. This continues to be an issue with POA ever since they have been unhappy with having to pay the assessment like every member. We are requesting a cease-and-desist order.
- The Generator is still being worked on and we will know more in the coming weeks.
- We were approved from Co-Bank on a loan for the 5,000-gallon pressure tank replacement project, which will satisfy TCEQ regulatory compliance now and for future growth in this community.
- G & W Engineering continues the work on the 120k gallon ground water storage tank replacement project. We are waiting on approval from TCEQ.
- We received word back from a company that we reached out to on the reverse osmosis water and ice kiosk services for the community within our gates. We are looking into other companies that provide this service. We will keep you updated on our progress.
- Thank you to Larry and Teresa Payne for donating a big screen tv to be used in the main water building for BOD meetings and presentations.
- Thank you, TexAir of Lampasas, Texas owner's Heath and Brandy Eckermann that are new to our community donated labor and a split unit at equipment cost for our main office.
- Keeping our community water supply safe is our number 1 priority, as well as our workers safety. This is a huge priority for CCWSC. In extreme weather the maintenance department is exposed to the elements as well as water. It is important for our employees to wear protective gear which includes reflective safety coveralls in the winter and reflective vest/or jackets, gloves and boots. If you see our workers on the side of the road, please slow down and give them the right away.

---

*CCWSC Employee's wear uniform shirts so that you can easily identify who works for the Water Department. If you see suspicious activity, please report it. We all need to work together to keep our community safe!*

---
